

Pantothenyl Ethyl Ether

Pantothenyl Ethyl Ether has excellent physical (solubility, anti-electrostatic, etc.) chemical (stability) and biological (transcutaneous absorption, etc.) properties. When Pantothenyl Ethyl Ether is applied to the skin directly or in cosmetic formulations, it is rapidly absorbed and changed into pantothenic acid (a constituent of coenzyme A) by hydrolysis and oxidation.

Product Name	Pantothenyl Ethyl Ether
Generic Name	Pantothenyl Ethyl Ether
INCI Name	Panthenyl Ethyl Ether
Appearance	Colorless to light yellow, clear, viscous liquid
Application	Skin care and hair care, etc.
Specification	Daiichi Standard
Storage	Protect against humidity and heat. Store at room temperature in tight container.
Standard Packing	20kg pail
